

John Addison - Senior Safety Instructor/Program Development

John has been hanging out at CANSAFE for almost 15 years. He brings quite an assortment of experience to the team including a journeyman roofer ticket, 40 years' experience truck driving and rig moving, 20 years of classroom experience as well as 15 years' experience as a firefighter (retired) with the Kitscoty Fire and Rescue. Holy Cow! Someone was definitely busy. This works for us because we are ALWAYS able to lean on him for subject matter expertise.

In his spare time at the fire hall (when there was some) John assisted in the training of many other firefighters with the Kitscoty team.

John's experiences with his varied history shows in every class he teaches as he is able to incorporate the knowledge and skills he has gained from his past and introduce it into the classrooms.
